APURV DAS

Full-Stack Developer — JavaScript/TypeScript, PHP, Python, PostgreSQL/Supabase

Phone: +91-9016119974 | Email: apps.apurv2000@gmail.com | Location: Ahmedabad, Gujarat, India
LinkedIn: linkedin.com/in/apurv-das-bb2050150 | GitHub: github.com/ApurvDas | Portfolio: apurvdas.github.io

SUMMARY

Full-stack developer with hands-on experience across PHP/CodeIgniter, the JavaScript/TypeScript ecosystem (Next.js, React) and Python (FastAPI, Flask). Built and deployed an offline-first project manager on Supabase/PostgreSQL with a Windows desktop app (Tauri), and a Next.js recipe platform with a signature motion system. Comfortable owning a feature end to end: data model, backend, UI, motion and tests.

TECHNICAL SKILLS

- **Languages:** C++20, Python, JavaScript, TypeScript, PHP, SQL, HLSL (Shader Model 4), HTML5, CSS3, Rust (basic, Tauri)
- **Web Frameworks & Libraries:** Next.js, React, FastAPI, Flask, CodeIgniter 4, Tailwind CSS, Jinja2, anime.js, three.js / react-three-fiber, Prisma, Auth.js / NextAuth, CodeIgniter Shield, Tauri, pywebview
- **Databases:** PostgreSQL, Supabase (Row-Level Security, RPCs), MySQL, SQLite, IndexedDB
- **Test Tools:** Playwright, pytest, PHPUnit, Vitest, CTest, unittest, JIRA, Android Studio, Android Debug Bridge (ADB), Android Emulator, Chrome DevTools
- **Networking & Security:** TCP / UDP sockets, HTTP servers and clients, binary protocol implementation, REST APIs, OAuth 2.0 (PKCE, Google OAuth), JWT, nmap, XSS / CSRF / IDOR testing
- **DevOps & Tools:** Git, GitHub Actions (CI/CD), GitHub Pages, CMake, vcpkg, MSVC, PowerShell, Docker, AWS
- **Concepts:** MVC Architecture, CRUD, Role-Based Access Control, Offline-First Sync, OOP, Responsive & Accessible UI, Reduced-Motion Support

WORK EXPERIENCE

QA Tester & Product Contributor (Part-Time) — Zentrax Solutions LLP | Apr 2026 – Present

- Perform manual functional, regression, exploratory and UI/UX testing of an intercity cab-sharing platform: the Android app, the web admin panel (backoffice) and its backend APIs.

AI / ML Intern (Remote Mentoring Program) — Pheme Software Pvt. Ltd. (IBM Platinum Business Partner), Remote | Jan 2026 – May 2026

- Built "AI Visual Search Engine for E-Commerce", an image-based product search system using CNN feature extraction and image similarity matching in Python.

Web Developer Intern — Technotask Business Solutions, Bhopal | May 2023 – Jun 2024

- Developed and maintained web applications using PHP, CodeIgniter (MVC), HTML5, CSS3, JavaScript and MySQL.
- Contributed to the company HRMS portal supporting employee records and management workflows.
- Improved system stability and sped up issue resolution with structured logging; worked in Agile sprints with Git and code reviews.

PROJECTS

Project Manager — Offline-First Web App + Windows Desktop App — Personal Project | Aug 2026 – Present

Tools: Supabase/PostgreSQL (row-level security), JavaScript, Tauri (Rust), Playwright, PHPUnit, GitHub Actions | Code: github.com/ApurvDas/project-manager | Live: apurvdas.github.io/project-manager

- Rebuilt a PHP project manager as a live Supabase app on GitHub Pages: projects, a role ladder (owner / manager / member / viewer), tasks with multiple assignees, a drag-and-drop Kanban board, tags, checklists, comments, notifications and an activity log.
- Built an offline-first sync engine: an IndexedDB copy plus an outbox replayed through server RPCs, with per-field conflict merging and data wiped on sign-out.
- Shipped a Tauri Windows desktop app with tray, notifications, browser sign-in and signed auto-updates, using about 170 MB idle against about 315 MB for Chrome; released through a GitHub Actions pipeline.
- 60 Playwright end-to-end tests and 32 role-based API permission tests across 6 user roles; the first version (PHP 8.3, CodeIgniter 4, MySQL) had 244 PHPUnit tests.

Ciba Library — Motion-First Community Recipe Platform — Personal Project | 2026

Tools: Next.js 16, React 19, TypeScript, Prisma, PostgreSQL, Auth.js / NextAuth, anime.js, react-three-fiber, Vitest, Playwright | Code: github.com/ApurvDas/ciba-library

- Built a full-stack recipe website with Next.js (App Router), backed by Prisma over PostgreSQL and Auth.js / NextAuth (email + Google OAuth, JWT sessions, bcrypt).
- Engineered an anime.js motion system (live servings scaler, FLIP grid re-layout, add-to-cart flight) plus a react-three-fiber WebGL hero, with light/dark and reduced-motion support.
- Shipped browse filtering, ratings and comments, a follows/activity feed and a per-user shopping list; 27 Vitest unit tests and 4 Playwright E2E tests.

Focus — Pomodoro & Reminders Web App — Personal Project | 2026

Tools: Python, FastAPI, Jinja2, SQLite, anime.js, pytest, GitHub Actions | Code: github.com/ApurvDas/focus-timer

- Built a focus web app: a Pomodoro timer with an animated countdown ring, reminders with recurrence and snooze, focus tasks, streak and stat tracking, and browser notifications.
- Kept the timer and reminder logic in pure, tested modules; 46 pytest tests run by GitHub Actions CI.

Khaata — Indian Expense Tracker — Personal Project | 2026

Tools: Python, Flask, Jinja, Tailwind CSS, Tkinter | Code: github.com/ApurvDas/BudgetApplication

- Built a multi-user expense tracker as both a Flask web app and a Tkinter desktop app, sharing UI-agnostic ledger logic through a common core module.
- Delivered dashboards (net balance, spending donut, cash-flow charts), per-category budgets, insights and CSV/XLSX import and export with strict validation; hashed-password accounts with CSRF-protected forms; every flow works without JavaScript.
- 24 tests, including 8 security tests.

EDUCATION

Master of Computer Applications (MCA) — UPES, Dehradun | Aug 2024 – Jul 2026 (Completed)

Bachelor of Computer Applications (BCA) — Christ (Deemed to be University), Delhi NCR | Apr 2024

Higher Secondary — NIOS | Jun 2020
